
hw-03: Interactive Website and Marks & Channels

This is a pair assignment

Purpose:

The purpose of this assignment is to build an interactive website. In addition, you will practice decomposing a visualization into marks and channels.

Tasks:

1. Programming Assignment (45 points)

This assignment will be completed using GitHub Classroom. Please accept the assignment with this link (<https://classroom.github.com/a/teWrKlll>) and follow the instructions in the generated repo.

2. Reflection (5 points)

Answer each of the following questions with your partner unless instructed otherwise.

- a) What is your biggest takeaway message from each of the tasks for this assignment?
- b) Did both of you put your best effort into this assignment? If not, what obstacle got in your way and how can you avoid it in future assignments?
- c) (Each partner individually) Name one contribution your partner made to this assignment that you are proud of.

Submission:

See Gradescope hw-03 for submission instructions.
